BVS[®] Bülbüloğlu
cranes Vinç San. ve Tic. A.Ş.

BVS Cranes established in 1985 in a small workshop in Ankara and developed to become one of the leading companies in crane manufacturing industry.

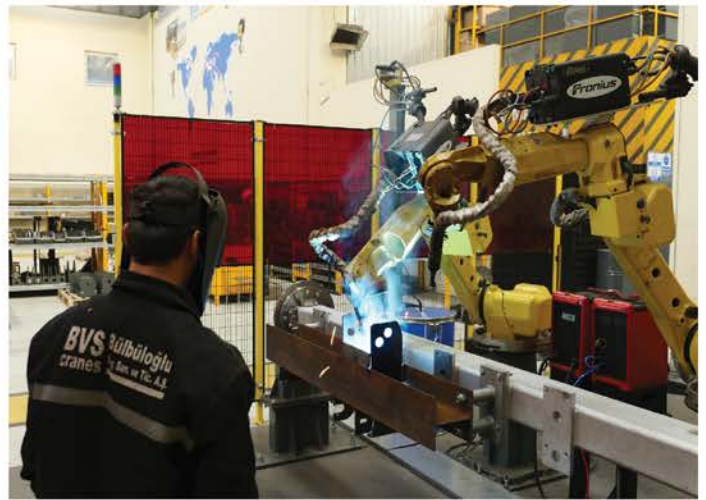

Today, BVS Cranes has a well-equipped factory extended in 37,000 square meter, three headquarters in Ankara, Istanbul, Izmir in Turkey and 40 sales offices in different countries.

We cooperate with the quality brands in parts and subcontractors and benefit from our design technology and experience to offer the highest quality in crane industry nationally and worldwide.

Our products are used in Turkey and in more than 60 countries worldwide.

STANDARD HOISTING GROUPS

BVS design and manufacture according to ISO, FEM and DIN standards in which compact body of hoists and wide range of capacity have considered.

OVERHEAD TRAVELLING CRANE

Overhead travelling cranes are manufactured according to ISO, FEM and DIN standards and designed for operating in both indoor and outdoor areas. They operate in the factories along the runway rails either on the gussets or on the girder and rails mounted on beams. The general field of use of overhead travelling cranes is carrying, stocking, loading and unloading.

Regarding different hoisting groups in the production portfolio and according to FEM standard, there are various types of hoisting groups in terms of lifting heights and speeds.

JIB CRANE

BVS jib cranes not only provide numerous advantages in carrying both light and heavy loads to the positions narrow and difficult to be accessible, but are also literally economic for most of industries. The capacity range of BVS jib cranes varies from 1 ton to 15 tons.

Being able to scan the work zone by 360 degree rotating arms, the jib cranes are able to move the desired weight within this zone. Moreover, jib cranes can rotate both manual and motorized (electrical).

Column jib cranes

Wall type jib cranes

HARBOUR CRANES

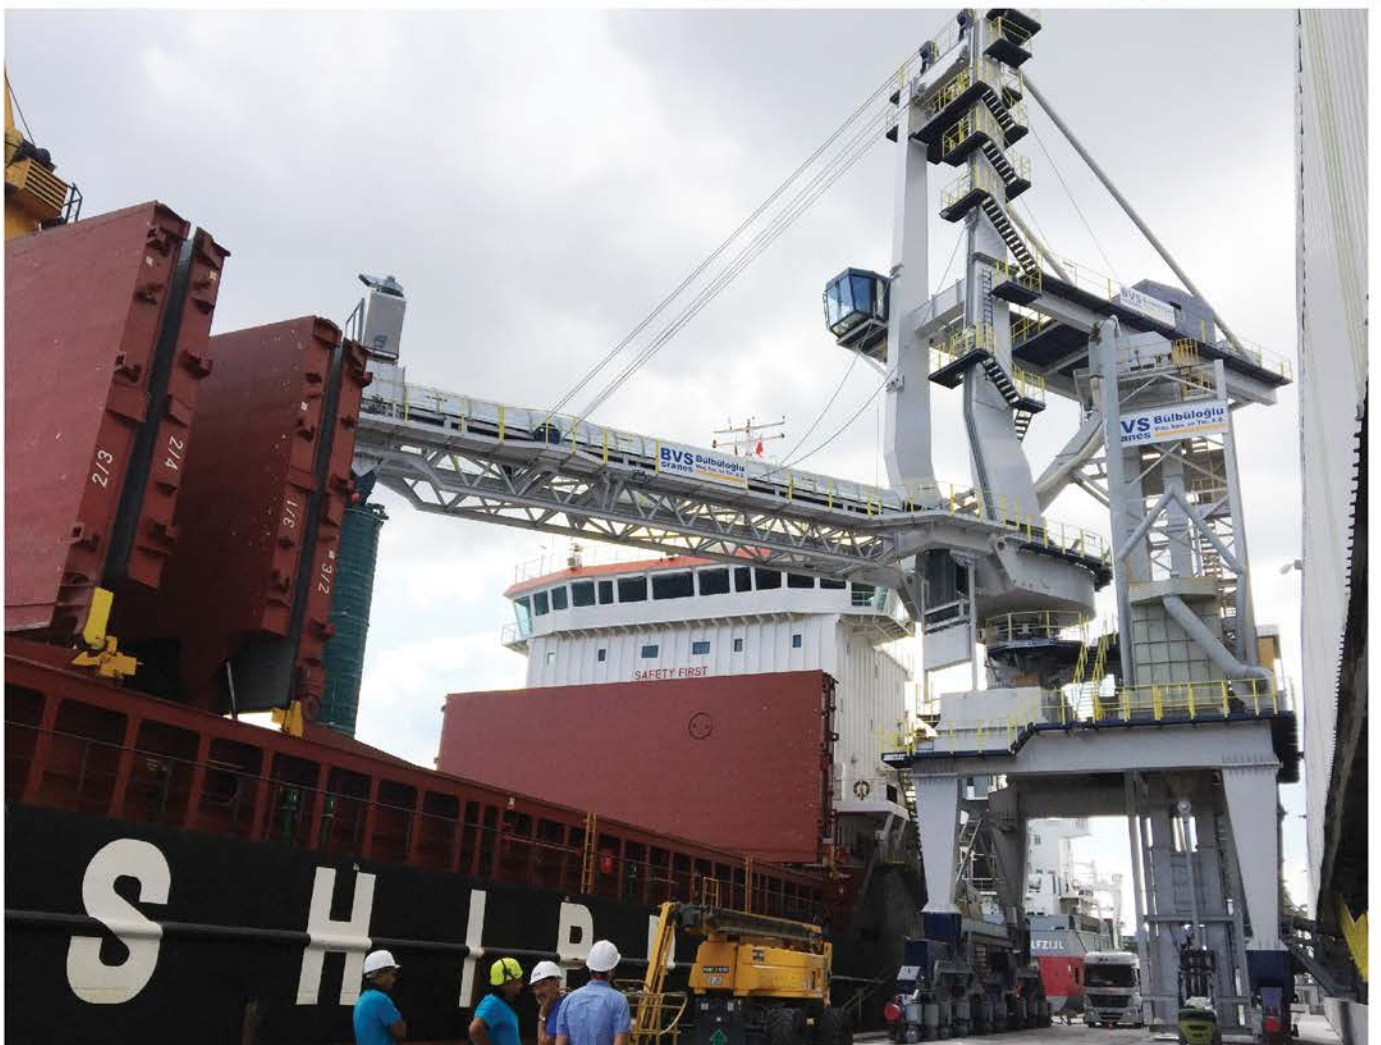

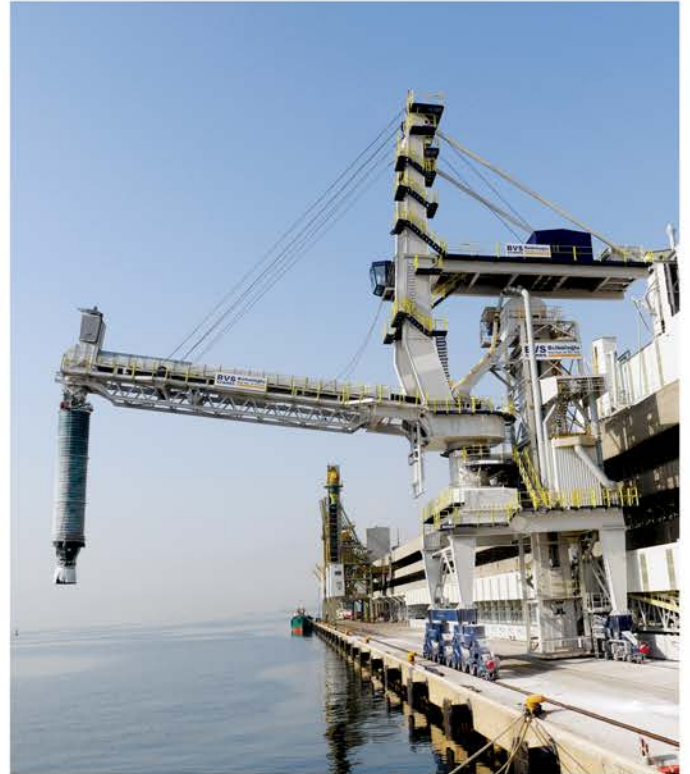

Ship loader cranes as special equipment have designed for material handling in large volume, high speed and continuous performance. Considering all these features BVS has supplied number of ship loader cranes in different harbours.

This equipment should be reliable and efficient for safe continuity of ship loading operation.

Benefiting from know-how in design plus state-of-art manufacturing has introduced BVS as a well-known manufacturer in this field.

Mobile ship loaders on rubber wheels

Shipyard Cranes

SPECIAL CRANES IN POWERPLANTS

BVS has supplied heavy turbine hall cranes in different types of power plants. In this type of cranes we need to include many design features to improve performance such as precise positioning, remote operator's control, variable speed, Optimized hook approaches and of course highest degree of safety.

EQUIPMENT FOR AUTOMOTIVE INDUSTRY

BVS Cranes provides different types of cranes to meet the requirements in car manufacturing industry. BVS offers special cranes to be utilized in different parts of production lines such as material handling division, press halls, assembly lines and warehouses which define different characteristics in services and safety.

HEAVY DUTY CRANE

500 ton Overhead Travelling Crane carries molten steel as hot as 1500 °C

Heavy duty cranes are designed to meet the requirements of various manufacturing processes in steel and casting industries. They also can be designed and manufactured according to the specific requirements of client considering working conditions.

We always have cautions about potential hazards in steel industry. Open flame, molten steel, severe heat and dust plus client's need for continuous production can be our major concern in design and manufacturing of heavy duty cranes.

Benefiting from our expert engineering team and developed manufacturing technology, BVS Cranes has the capability of working in high efficiency and safe conditions.
